ABOUT ME

Excited BBA graduate looking to apply great business analysis and strategic management experience to an innovative organization. Passionate about the use of data-driven insight and business intelligence tools to discover market trends and operational efficiencies. Committed to applying project management and process optimization skills for the delivery of innovation in support of team aims. It excites me to work with different teams for impactful solutions that can help the company grow. I am committed to continuing learning and staying on top of rapidly emerging technologies and industry trends to continue winning together.

PROJECT

Finished a group project called “ A Study on Recent Performance of Tata Motors with their Financial Statements”.

We examined key figures like revenue, expenses, and profits to assess the company’s financial health. By comparing these numbers to past performance and industry standards, we gained insights into Tata Motors’ strengths and challenges, highlighting how they are adapting to market changes.
